

# kushina waifu

\$kushina token is a waifu + defi token. were you get features of defi token in your fav waifu token.

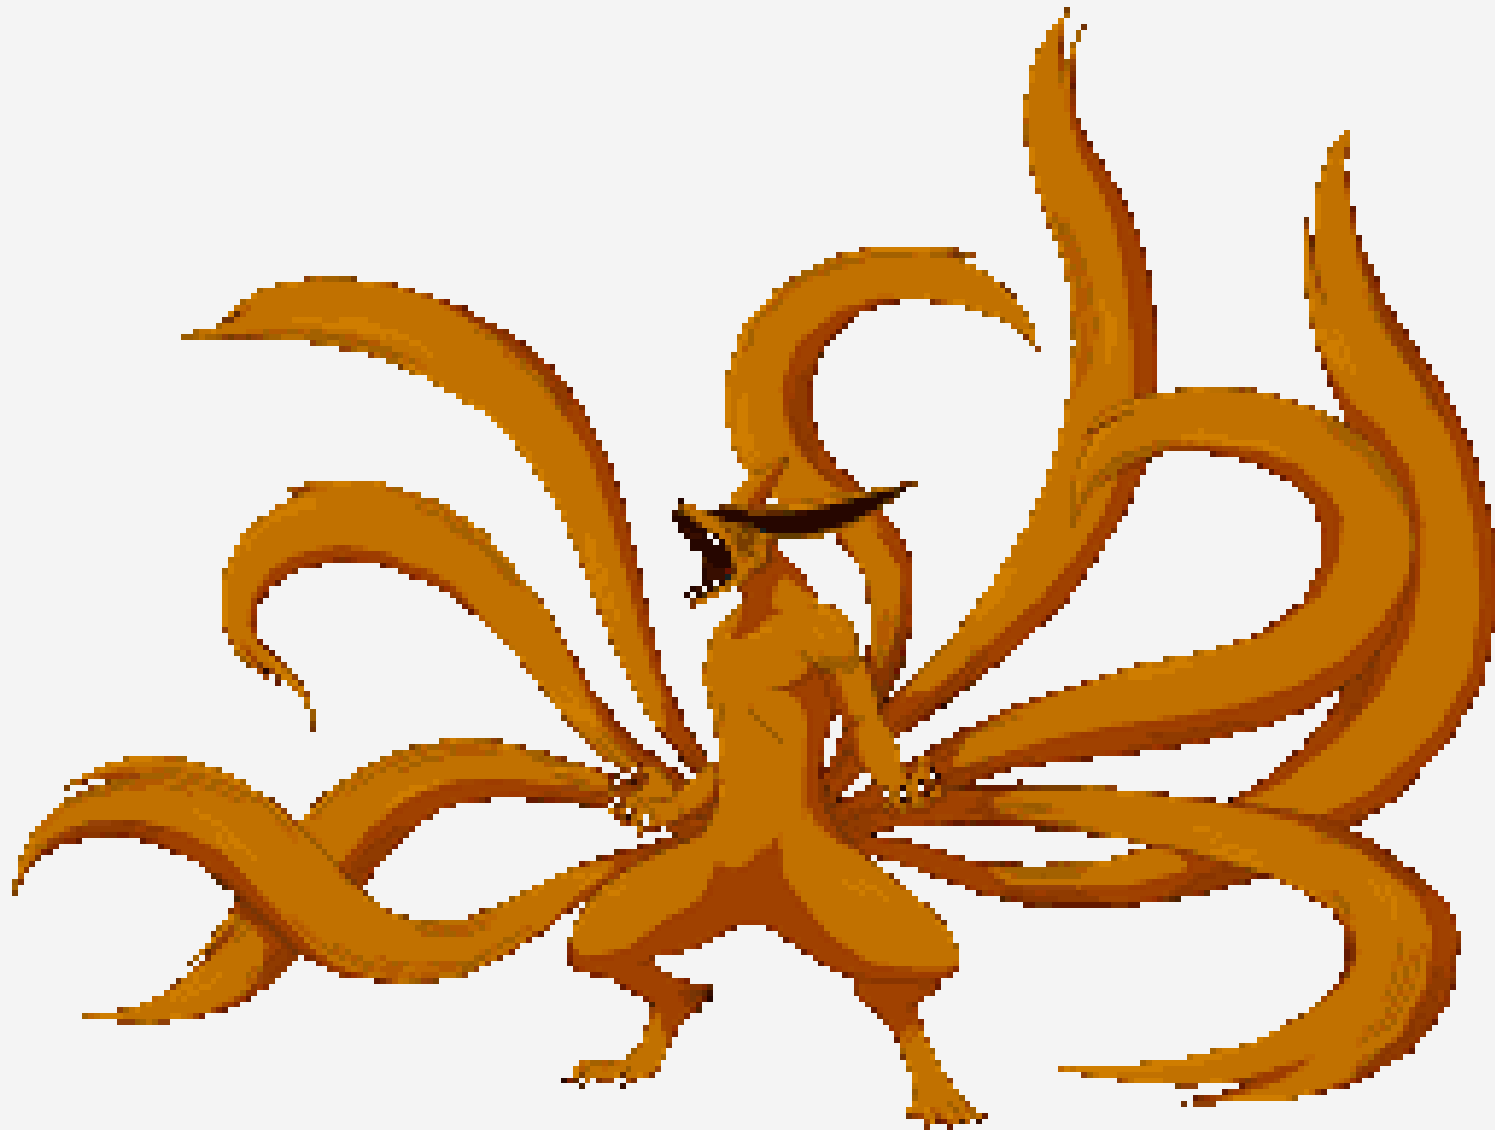

# why kushina waifu ?

if you watch the market right now ( nov-2021 to april-2022 ), you can see every meme token is down. not just 5-10% down, it is 40-80% down. we need to change this. even your biased meme token is down.

Kushina solve the price drop by bringing utilities to your fav waifu token.

# Problems

that are faced by meme coins

## price drop due to no use case

we cant always wait for new buyers to pump the price. that is what we call ponzi.

## price drop due to supply drop

minting new token in order to give a reward without carrying its total supply.

## presale investors drop the bag

allowing investors to buy more and dumping on retailers.

# Solutions

\$kushina will change the system and your mind.

## ✓ use case

---

use case such as own exchange, defi tools, launchpad, lending platform will keep the users within ecosystem.

## ✓ supply lock

---

new token will not minted. and rewards will be distributed in \$busd or other token to reduce the dump.

## ✓ big bag drop

---

users will not able to buy big bags in sale and price dump will be stoped using treasury.

# How \$kushina started

\$kushina was conceptualized by three crypto investors who wanted to change the future of meme coins.

# It's time to level up

## 01 utility with fun

a waifu token with utility is the best way to enjoy it. A fun community and a better project to look at.

## 02 increasing the holders

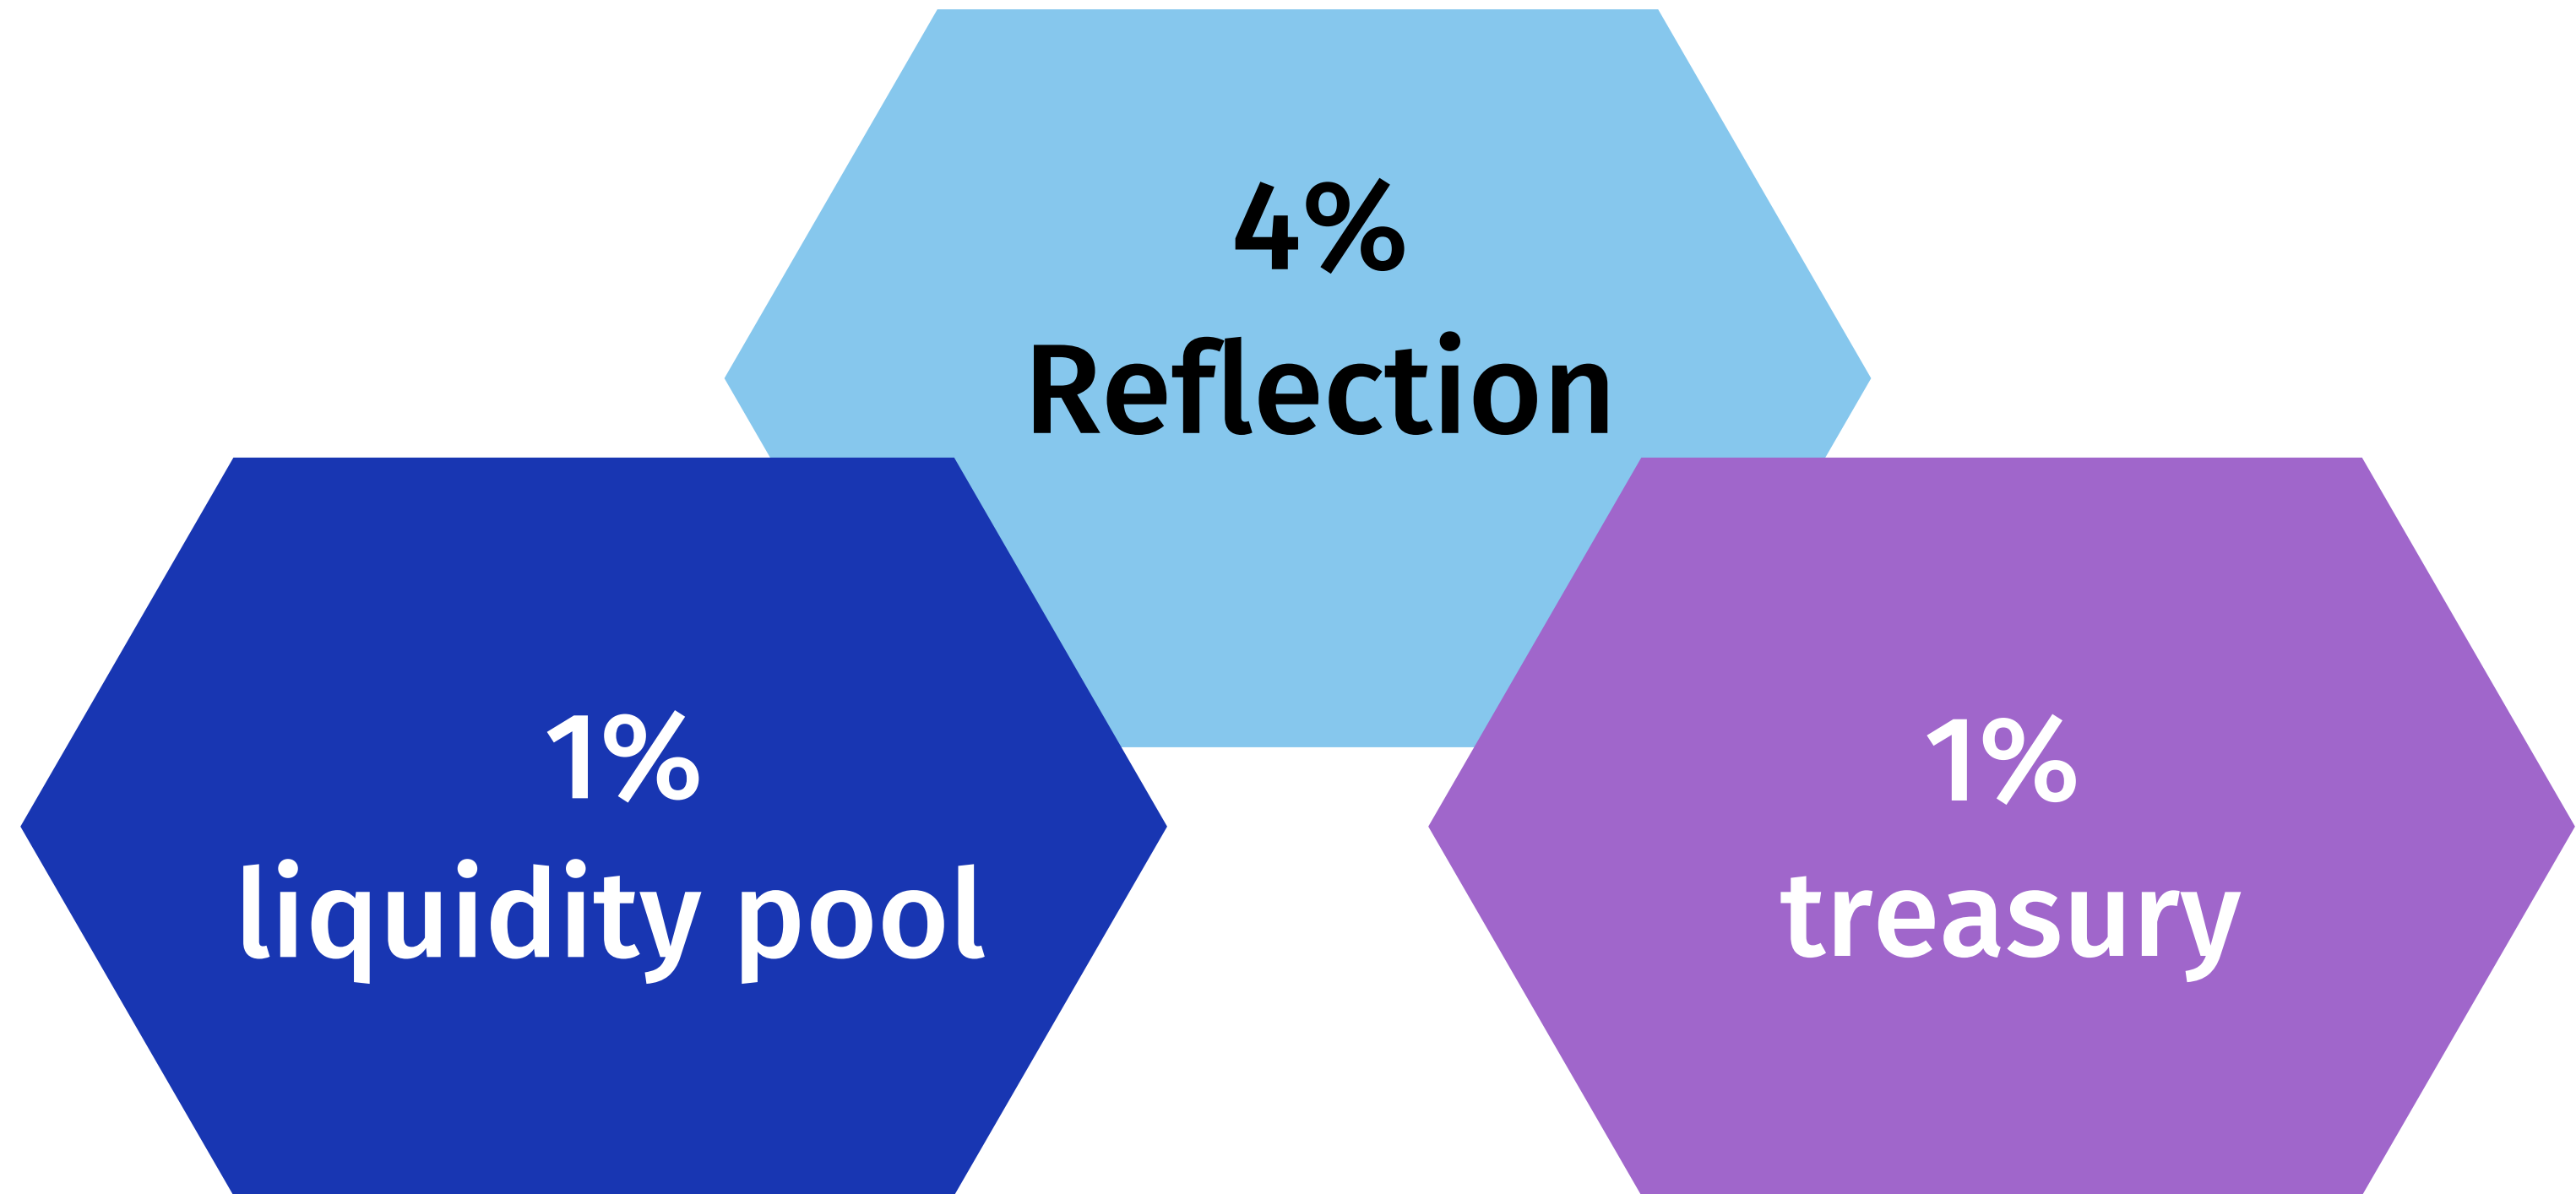

rather than 1000 people buying, we will focus on 1m people buying the project to make it stable in price.

## 03 expanding the project

\$kushina will be participating in the project that can change the future of blockchain. making a utility coin in that project.

# tokenomics

01

## easy to participate

users can easily participate in the \$kushina project. \$kushina will be easy to handle and you can also earn with \$kushina.

02

## fair participation

users can only buy 0.02% in public sales. no more tokens will be allocated for the single wallet in sale to avoid dumping after the listing.

03

## kushina swap

kushina swap and kushina tools special features can only be used if you hold a minimum of 10000 \$kushina in your wallet.

04

## expanding to other project

numeric will not only build but will also participate in other projects. you will be able to use \$kushina in other projects. mainly in games and metaverse projects.

# Competitor Approach

## Partner with projects

to sustain itself in the market, \$kushina will partner with other projects, influencers, etc...

## Partner with future projects

\$kushina will partner with other newly born projects. we will also try to bring utility for \$kushina in their project.

## Online Marketing

we will be using online marketing to make \$kushina famous. after all our main goal is to launch it fairly than one person holding more tokens.

# token allocation

## 1 Trillion

TOTAL SUPPLY

## 40% sale

PUBLIC SALE WITH BUY LIMIT. will use to build kushina swap and kushina tools.

## 50% liquidity

WILL BE USED TO ADD LIQUIDITY.

## 10% marketing

WILL USE FOR MARKETING THE PROJECT
