

kushina waifu

\$kushina token is a meme + defi token. were you get features of defi token in your fav meme token.

why kushina waifu ?

if you watch the market right now (nov-2021 to april-2022), you can see every meme token is down. not just 5-10% down, it is 40-80% down. we need to change this. even your biased meme token is down.

Kushina solve the price drop by bringing utilities to your fav waifu token.

Problems

that are faced by meme coins

price drop due to no use case

we cant always wait for new buyyers to pump the price. that is what we call ponzi.

price drop due to supply drop

minting new token inorder to give reward with caring its total supply.

presale investors drop the bag

allowing investors to buy more than 1% and dumping retailers' bags.

Solutions

\$kushina will change the system and your mind.

✓ use case

use case such as own exchange, launchpad, lending platform will keep the users within ecosystem.

✓ supply lock

new token will not minted. and rewards will be distributed in \$busd or other token to reduce the dump.

✓ big bag drop

users will not able to buy big bags in sale and price dump will be stoped using treasury.

How \$kushina started

\$kushina was conceptualized by three crypto investors who wanted to change the future of meme coins.

It's time to level up

01 utility with fun

a meme coin with utility is the best way to enjoy it. A fun community and a better project to look at.

02 increasing the holders

rather than 1000 people buying, we will focus on 1m people buying the project to make it stable in price.

03 expanding the project

\$kushina will be participating in the project that can change the future of blockchain. making a utility coin in that project.

token allocation

1 Billion

TOTAL SUPPLY

10% sale

PUBLIC SALE WITH BUY LIMIT.

25% liquidity

WILL BE USED TO ADD LIQUIDITY.

THE REMAINING TOKEN WILL BE
LOCKED FOR FURTHER DEVELOPMENT.

01

easy to participate

users can easily participate in the \$kushina project. \$kushina will be easy to handle and you can also earn with \$kushina.

02

fair participation

users can only buy 0.05% in public sales. no more tokens will be allocated for the single wallet in sale to avoid dumping after the listing.

03

future of project

75% of the token supply will be locked and will use to bring new utility to token. currently \$kushina have some idea in mind and will bring it to users. such as launch pad, lending platform etc..

04

expanding to other project

numeric will not only build but will also participate in other projects. you will be able to use \$kushina in other projects. mainly in games and metaverse projects.

Competitor Approach

Partner with projects

to sustain itself in the market, \$kushina will partner with other projects, influencers, etc...

Partner with future projects

\$kushina will partner with other newly born projects. we will also try to bring utility for \$kushina in their project.

Online Marketing

we will be using online marketing to make \$kushina famous. after all our main goal is to launch it fairly than one person holding more tokens.
